The stand wall composition could be organised in various ways as it is a flexible idea in several meanings: for the spacial and wall distribution. Here as an example will be presented the central composition.

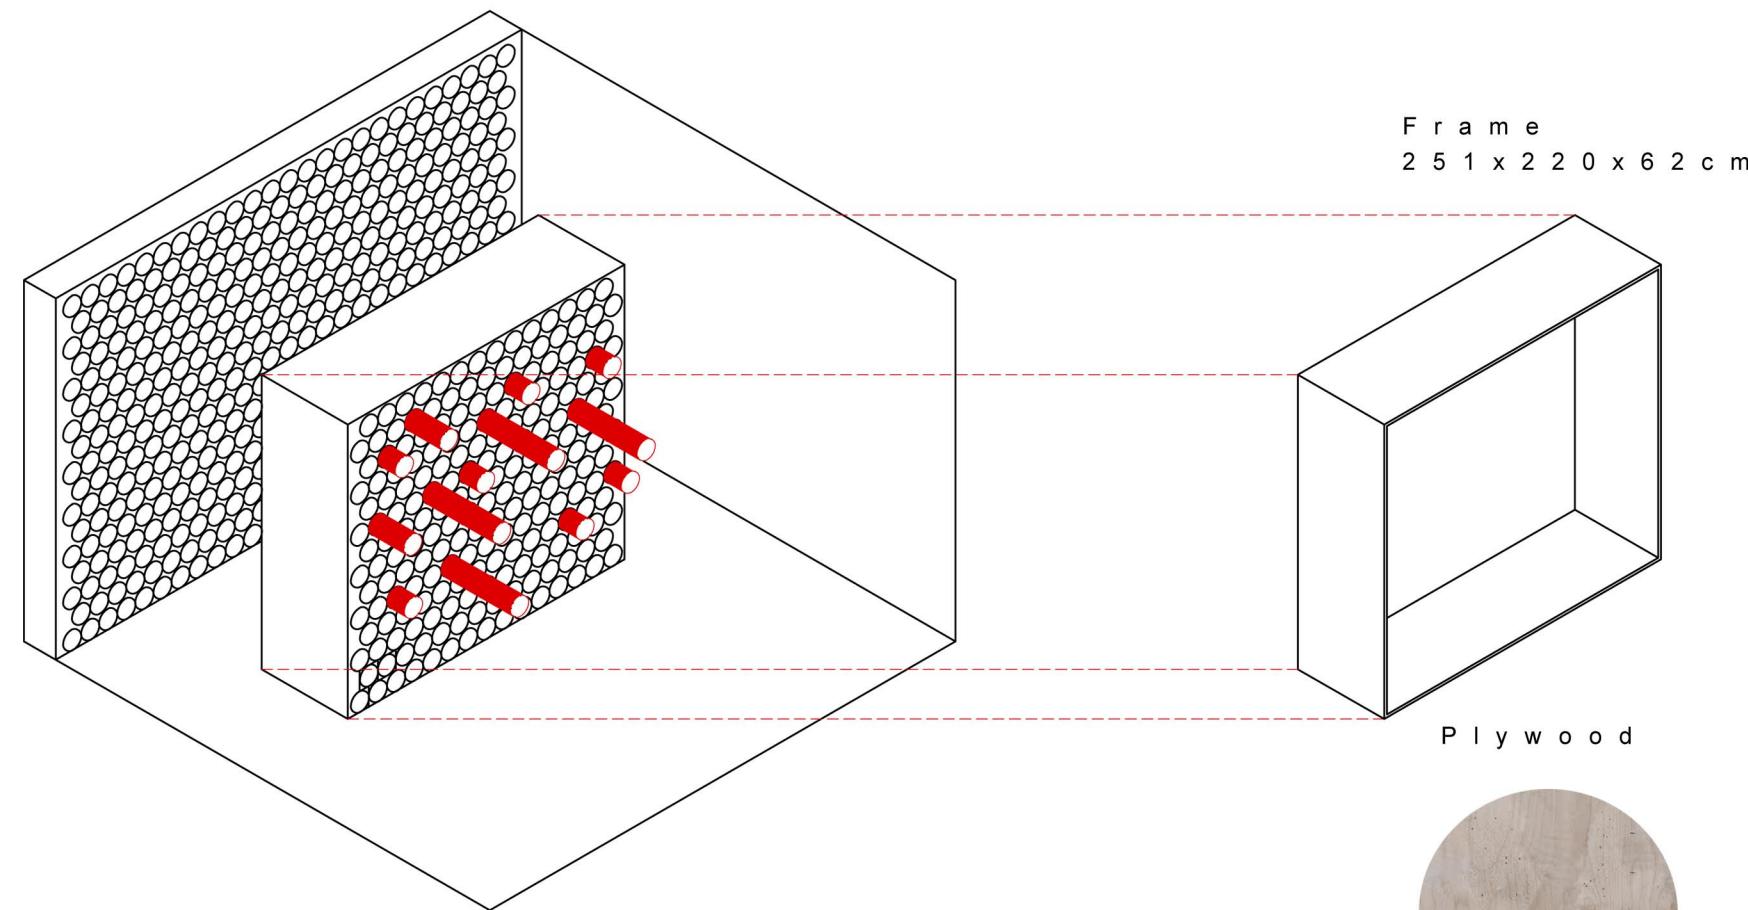

The main elements are: **1) the tube wall as the souvenirs container, 2) the frame filled with the tubes and cardboard telescopes. Bouth elements are illuminated with the LED strip in the back part.**

Simple and recyclable materials could create an optical variation and an entertainment.

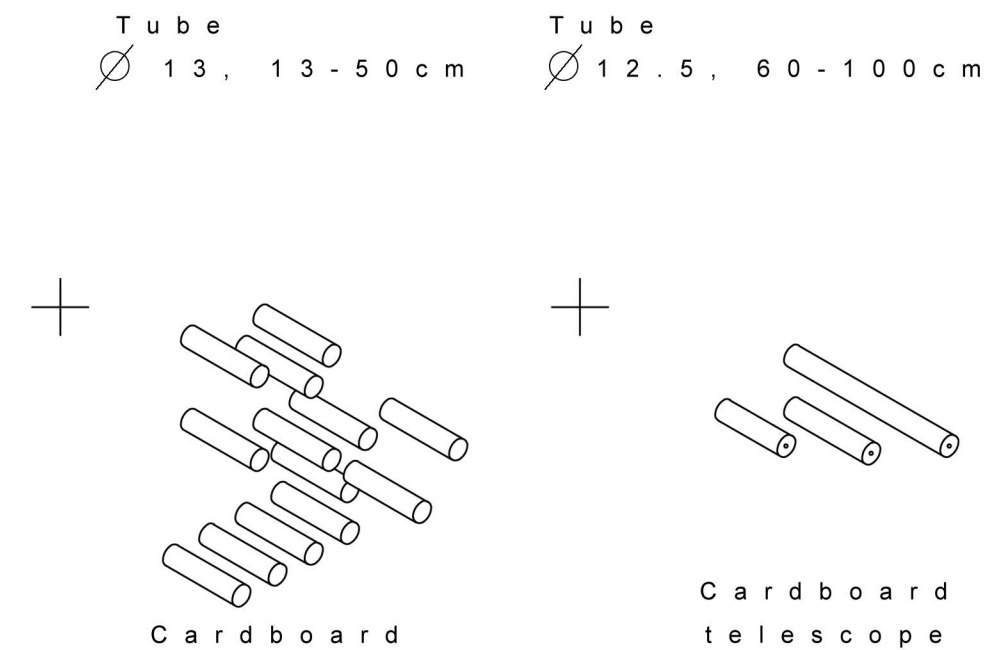

The colour options could be studied as well.
