architecture elsewhere

installation concentrates on architecture elsewhere. architecture that is not found in estonia, latvia, lithuania or any other point in the world, while everywhere and right here. it is architecture that is found in us.

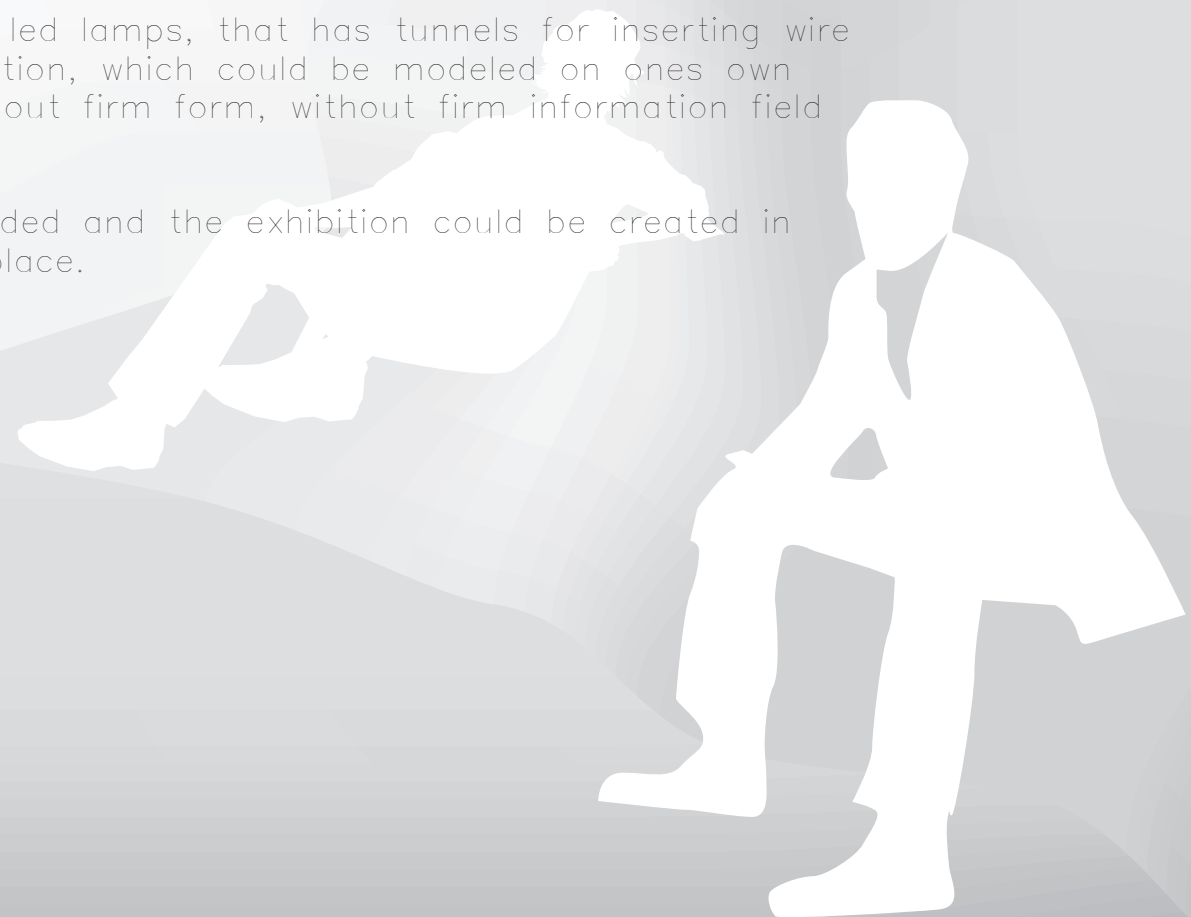

our world is full of information.

given exhibition focuses on creating pure mental void/space. to give visitors opportunity to clear their mind from redundant and concentrate on main. on what is truly important for us, the ones we care for and for future generations.

exhibition creates non information space. space without form— pure and light(the form itself contains information)

the space is created from white textile cloth with led lamps, that has tunnels for inserting wire (like in the tents). the wire is bearing construction, which could be modeled on ones own desire. therefore created space is undefined, without firm form, without firm information field

the wire could be removed from the textile, folded and the exhibition could be created in another place.

primal size of installation (textile) is 3,5x,3,5x2,6

souvenir is a book with white pages.
