

Tale " Soul City ".

What then is the city's soul?

What was pirmais- city or soul?

What is needed for the soul to be able to incarnate?

It all started long ago, long ago, the same, the very foundations. Just like people, as mothers as women. His himself, to himself, in his lap, while growing as a young girl make up yourself, your body as a city in its own way as a dwelling.

Loving yourself, creating, dwells spot to itself, which will be able to grow the new man, her baby. Nurturing yourself and loving yourself, young woman to establish a home for a new soul, a new man. Because this home is a safer, healthier, cleaner, more pleasant, because the people there will dwell and grow favorably. Then he will be able to grow stronger, healthier, happier.

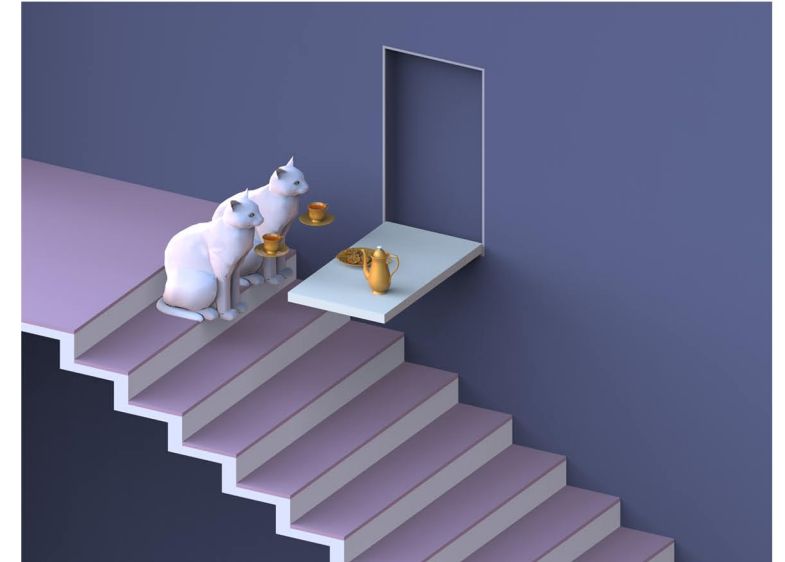

It is also a city. This is where we all live, people.

If we are building the city as home to the souls, souls templi- safe, beautiful, healthy, inspiring, exciting, consistent with each other, the city becomes a place where life can live, enjoying it and developing themselves, the development all together.

If the city is nurtured and developed with such a caring and loving attitude, as a pregnant woman, then any other man it feels a lot better and safer and can really grow and develop, to be happy. That's what the human eye sees, where he spends his days, as he was walking around - city and architecture is in his room, in his **cradle**. It is interesting and significant that the little man in the womb is izaudzis- mother's womb was his first home.

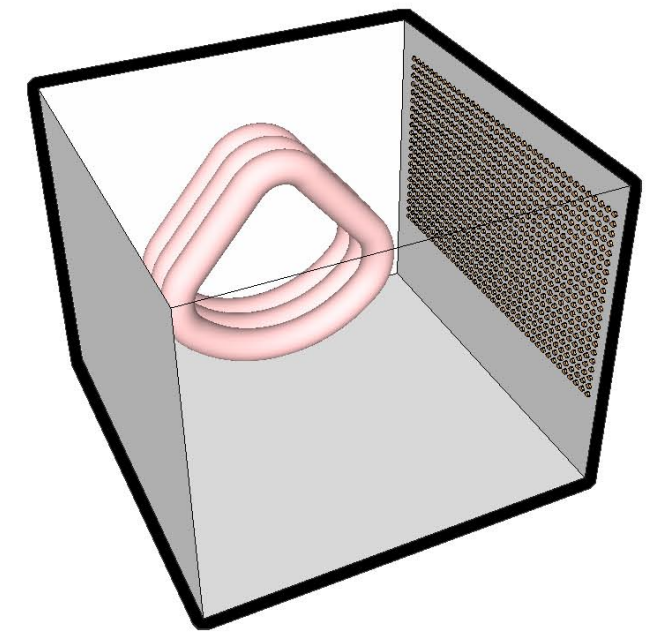

And then the little man is born, entering the world, the whole world around him is his city. The first room is his cradle. If we are all people, city dwellers are all as one body, residents flock. The city where we have our family **cradle**. Our **cradle** must be safe, pleasant, warm, loving constructed according constructed, to create us so that we are good. Such must be the city. The future of the city.

For a man, a family can grow, to live in harmony, to live happily and develop. Live in joy, in, love and happiness. We have to find ways how to really establish, implement. We need everyone has a great role. How do we create the world around him. How we treat your cradle, your space and land. For we make our city.

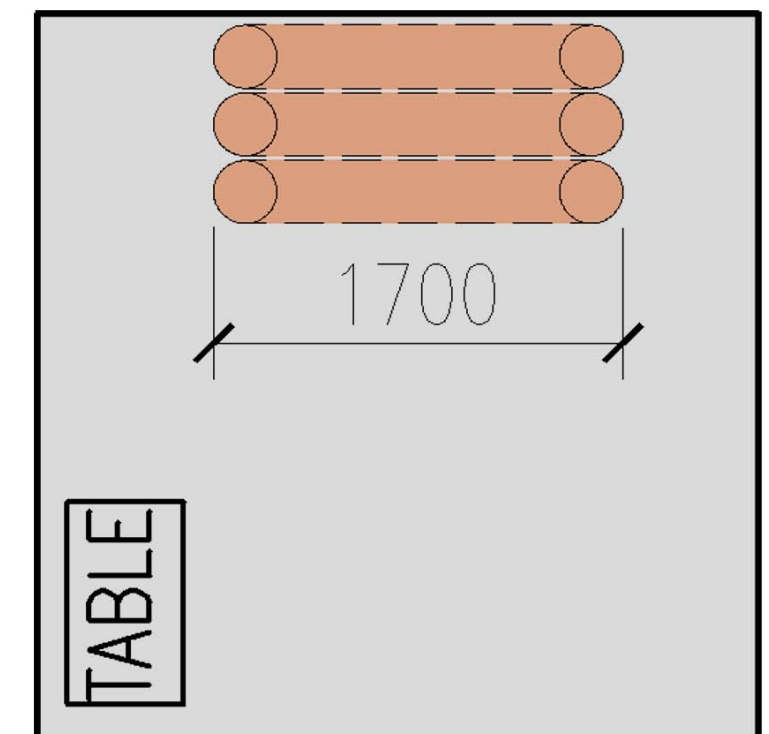

Infographic wall about Baltic states architects and their works.

Souvenirs wall

The main inflatable design object
CRADLE
is made from a bioplastic film.

Inflatable object and
small clay souvenirs
are lightweight and
takes minimum transportation
space and gives maximum effect

SOUVENIR

Souvenir is made of clay - material occurring in Baltic states naturally
Glazed with 3 types of glazes.
